

Test 1 FY2018 USDA Information Security Awareness Training

Importance of ISS

1. The goal of ISS is to: (Select one)

- A. Encourage hackers.
- B. Protect information systems against unauthorized access.
- C. Decrease availability of systems.
- D. Both encourage hackers and decrease availability of systems.

2. The Federal Information Security Modernization Act (FISMA): (Select one)

- A. Defines national security systems.
- B. Mandates a computer security program at all federal agencies.
- C. Requires a greater level of protection for Government information systems that contain Privacy Act information.
- D. All of the answers are correct.

Overall Threats

3. Natural threats to information systems include all of the following except: (Select one)

- A. Hackers
- B. Fire
- C. Poor wiring
- D. Insufficient cooling

4. Both internal and external threats can bring down a system. Which of the following represents an internal threat? (Select one)

- A. Disgruntled User
- B. Hackers
- C. Terrorist group
- D. Protesters

Social Engineering Threats

5. Theo receives an email from his bank while at work. The email emphatically states that he must verify his personal information immediately or his account will be closed. He clicks the link provided in the email and enters all of his information online. This is an example of: (Select one)

- A. Email attachments
- B. Cookies
- C. Phishing
- D. Mobile code

6. Protecting your identity is essential, even on your personal or home computer. You should consider doing all of the following except: (Select one)

- A. Respond to emails asking you to verify your personal information.
- B. Ask how information will be used before giving it out.
- C. Pay attention to credit card and bank statements.
- D. Avoid common names/dates for passwords and PINs.

Internet & Network Threats

7. Darren wants to make sure that he protects his identity. He should do all of the following except: (Select one)

- A. Ask how information will be used before giving it out.
- B. Shred unwanted documents that contain his identifying information.
- C. Pay attention to his credit and bank statements.
- D. Carry his social security card in his wallet.

8. Lauren gets an email with an attachment from the director of her agency. It has a file attachment with an unfamiliar file extension. Lauren should do all of the following except: (Select one)

- A. Open the attachment.
- B. Verify that the sender sent the email and attachment.
- C. Be suspicious of this email and attachment.
- D. Call the help-desk for advice on handling the situation.

Media Devices and Mobile Security

9. Unlocking your smart phone removes security protections that protect your mobile device from malicious applications. (Select True or False)
- A. TRUE
 - B. FALSE
10. Maria has been issued a USDA laptop. She should do all of the following to ensure that she complies with USDA policy except: (Select one)
- A. Be careful of information visible on her laptop screen.
 - B. Have someone watch her laptop at all times when traveling.
 - C. Ensure wireless security features comply with USDA policy.
 - D. Protect her user logon information.

Physical Security & Classified Information

11. Agnes wants to make sure she knows which steps to take to avoid spillage. You advise Agnes to do all of the following except: (Select one)
- A. Check all emails for possible classified information.
 - B. Store classified data on her PDA when traveling.
 - C. Properly mark and store all removable media.
 - D. Ensure all file names and subject headers identify the sensitivity of the information.
12. Tom can use his privileged (administrator) account to do all of the following except: (Select one)
- A. Resetting user passwords.
 - B. Day-to-day work.
 - C. Updating system configuration settings.
 - D. Upload patches.

User Roles and Responsibilities

13. All of the following are acceptable procedures for backing up classified information except: (Select one)

- A. Store backups in your desk drawer
- B. Back classified information up daily
- C. Label backups with sensitivity labels
- D. Store backups at an approved secure location

14. What is not PII? (select one)

- A. Information about or associated with an individual
- B. Place of birth
- C. Zip code
- D. Employment History
